

Date of Meeting: Saturday, Aug 9, 2025

It's been a very busy summer here at MLHS, hard to believe it's coming to an end already. Here's some bullet points of the big stuff happening the last few months:

- Painted the entire commons and will be "re-decorated" with guidance from our Interior Design Committee.
- Re-wired all lights in the commons to LEDs and submitted for a rebate from Focus on Energy (about \$450). A total of about 200 fluorescent bulbs were replaced.
- Classroom updates in room 209, 210, 212, 214.
 - New ceiling grids and LED lighting installed
 - Removal/disposal of old grid/tiles and installation of new tiles done by MLHS staff
 - New grid installed by Verhalen Inc.
 - Electrical works done by Northern Lights Electric
 - Fresh paint and new whiteboard in room 214
- Press box of main gym
 - Hung 4 new TVs, new scoreboard camera installed, tied up other misc. loose ends from the building project.
- Football score board
 - Pressure washed, fresh paint, and new decals

We also had our newest custodian, Tyler Hafner, start a few weeks ago. He is doing very well so far and seems to be a great fit for our school. A fair amount of my time was spent with him during his first couple of days just helping him get his bearings and whatnot. Additionally, I am starting to work on a "rough draft" of what each custodian's main duties will be during the school year. Marty is back to work full time starting this week and I believe he has been relieved of all restrictions following his surgery.

Lastly, just a couple things to keep on our radar that are on the horizon. We still have 3 dead ash trees near the intersection of Rapids and Wildwood that need to come down. We did get a quote for that work to include dropping the trees, brush cleanup, wood removal, stump grinding, and clean up for a total of \$5,000. Also, the music wing parking lot is in need of re-sealing. If not this year yet, then for sure it will need to be done next year. We have one quote for that work at about \$5,200.
