

A Lasting Gift from the Class of 1981

As the MLHS Class of 1981 celebrates its 45th Class Reunion, we are deeply grateful for the class's desire to mark this milestone with a meaningful and lasting gift to Manitowoc Lutheran High School. That gift is to provide cabinetry for the new STEM (Science, Technology, Engineering, and Mathematics) classroom. This space gives students opportunities for hands-on learning, problem-solving, innovation, and collaboration. The cabinetry is a critical part of the room, creating an organized, safe, welcoming environment where students can learn and create with confidence.

The cost for the cabinets is **\$10,000**, and that is the ambitious and generous goal your classmates have chosen.

This is a project your entire class can be proud of, and **every member of the Class of 1981** is invited to participate. The amount isn't what matters most. What matters is joining together. Whether your gift is \$25, \$100, \$500, or more, every contribution moves us closer to the goal and demonstrates your shared commitment to Christian education.

Want to help inspire others? Consider offering a **matching gift challenge**. The Classes of **1975 and 1976** recently used matching challenges to rally their classmates, and both classes successfully achieved their goals. When classmates see their gifts doubled, participation and excitement grow quickly. Contact Kevin Buch at kmbuch@mlhslancers.org or 920-973-0465 if interested in being a match challenger.

Imagine what you could accomplish if every classmate participated and a few stepped forward to lead the way.

Forty-five years ago, MLHS invested in us, and this is one way we can invest in the future of MLHS.

Make a gift. Accept the challenge. Leave a legacy.

"Thank you, Class of 1981, for considering a gift that will help organize ideas, inspire innovation, and support student success."

Sincerely,

Kevin M. Buch
MLHS Director of Mission Advancement
